

Prior Authorization List

Citizens Rx requires review of certain drugs before your plan will cover them. This is called prior authorization. It ensures that you have tried preferred alternative drugs that are proven to be better tolerated, less expensive or less likely to cause interactions. It is also to make sure the drug is being prescribed appropriately. If you fill or refill a prescription for any drug that requires prior authorization, your doctor must receive approval from Citizens Rx before your medicine will be covered. Medicines that require prior authorization are listed below. This list is not all inclusive.
